## Purpose

The purpose of the Space Status Report form is to allow SPT Student Employees to easily evaluate, document, and track issues they spot in the SPT spaces including the ELL, Composites, AutoShop, and others. These submissions will also be used by SPT Staff as an “at-a-glance” report of the number and types of issues that occur in the ELL as well as the associated teams. Another goal of the form will be to make it easier to contact teams regarding issues in their area(s) to promote stewardship and safe working practices.

Noticed issues should still be recorded in the SPT Student Employee Log spreadsheet for the time being while issues get ironed out in the new system, but this form aims to make the process more streamlined overall.

This system is a work in progress and feedback is greatly appreciated!

## Usage Notes

- Team issues can be processed by sending an email to that team address – formatted as a notification
- Operations team takes care of the issues flagged for them during shift.
- This form should be filled out by SPT Student Employees and Staff only. Team members, safety leads, student members etc. should not be given access to this form (for now).
- Upon noticing an issue in any of the SPT spaces, an SPT employee should complete the form to the best of their ability.
- One form should be submitted per issue – we should not be combining multiple issues into a single form submission.
- Photo uploads are not required, but are very helpful in both identification and documentation of issues, so should be included whenever possible.
- Issues that involve the SPT space but not is not the responsibility of a specific team (e.g. a flickering light over a bench) should be attributed to the operations team by using the “Operation Team” option in the team dropdown menu.
- If you are unable to determine the team responsible for an issue, you should select “Unknown / unsure” for the team selection and indicate that the team is unknown in the “Optional Comments” field. A description of the location will be especially important in such cases.
- If you have an issue that does not neatly get categorized by the form, do your best to describe the issue and submit the form.

## SPT Space Status Report

Last Revised: 10/20/25

Revised By: Jatin Mukerji

- You contact Jatin or Noah on Slack so that we can add fields to the form to catch that type of issue in the future.
- If you have issues of any kind with the form, feel free to DM Jatin on Slack.

## **FAQs**

(This section will be updated as we receive feedback from form users).
